# It's time to Manage Strategy

The first battle of the performance management revolution was waged on the desktops of upper management. Countless presentations and spreadsheets were created from scratch and shared among a handful of people. This process was incredibly time consuming, and it wasn't uncommon for the data to be uselessly out of date by the time it was circulated. Every once in a while a gross oversight was caught and corrected, but most of the time the quiet failures fell between the cracks.

The second charge is now being fought on the World Wide Web. Gone are the days of limited access to information and shuffling around stale data. Employees at all levels of the organization can see the latest numbers at a glance, and are immediately alerted to potential problems while there's still time to do something about it. More importantly, with the new visibility provided by the web-based software, there's nowhere to hide. People are being held accountable.

Spider Strategies' Scoreboard provides your organization with all of the tools it needs to join the performance management revolution. We invite you to join us at [spiderstrategies.com](http://spiderstrategies.com) to learn more.

“*Spider's software has helped cut decision making time within the FDA from months to days.*”

— Frances Benedict  
Food and Drug Administration

## Scoreboard

Performance Management Dashboard

Spider Strategies' Scoreboard is web-based performance management software. It can transform your organization in three simple areas: people, processes, and paper.

**People:** CMS provides everyone in your organization with secure, up-to-date information from any web browser.

**Processes:** Use powerful tools like Management by Strategic Initiative, Balanced Scorecards, and Metric Analysis to track performance. Assign tasks for accountability.

**Paper:** Create, view, and print reports. Export to Microsoft Office applications. Manage and track changes to shared documents.

Spider Strategies, Inc., is a pioneering software company with offices in Washington, D.C. and St. Paul, MN. Spider Strategies helps corporations, government, and military organizations drive industry-leading performance through the use of its performance management/business intelligence software.
